Editorial Information

Accounts of Chemical Research publishes concise, critical reviews of research areas currently under active investigation. Most articles are written by scientists active in the area reviewed. Reviews may be concerned in large part with work in the author's own laboratory, providing that relevant contributions by other investigators are mentioned sufficiently to place the author's research in perspective.

Also published are occasional articles in which the author offers a critical assessment of a subject that has become somewhat muddled or even controversial, and proposes unifying concepts to clarify it. Instructions for authors are contained in the "Statement of Policies and Procedures" printed in the first issue of each

volume. Please conform to these instructions when submitting manuscripts.

Manuscripts for publication and editorial correspondence prior to acceptance of manuscripts for publication should be sent to Joan S. Valentine, Editor, Department of Chemistry and Biochemistry, UCLA, Los Angeles, CA 90095-1569.

Manuscripts should be prepared in accordance with the general instructions given in *The ACS Style Guide* (available from Distribution Office at the ACS Washington address). They should be typed double spaced, submitted in quadruplicate, and accompanied by a completed copyright status form (see January issue).

Each manuscript is assigned a unique document number during editorial production. This nine-character code, printed at the end of the article, serves as a link between the document in the printed product and electronic products and makes it easy to retrieve the full text of the exact article.

Correspondence regarding **accepted papers and proofs** should be directed to the Journals Department at the address shown.

The American Chemical Society and its editors assume no responsibility for the statements and opinions advanced by contributors. Views expressed in the editorials are those of the writers and do not necessarily represent the official position of the American Chemical Society. Registered names and trademarks, etc., used in this publication, even without specific indication thereof, are not to be considered unprotected by law.

1995 Subscription and Ordering Information

Members may share/donate their personal subscriptions with/to libraries and the like but only after 5 years from publication.

	U.S.	Canada and Mexico	Europe*	All Other Countries*
