Subject index

Volume 59 (2002)

- Acute phase 59, 105
Adults 59, 29
Attention 59, 69, 147, 207
Auditory evoked potentials 59, 121
Augmenting/reducing 59, 121

Blink startle 59, 147
Brain activity 59, 187

Cardiac inter-beat interval 59, 207
Cardiovascular activity 59, 1
Categorical perception 59, 171
CFS 59, 15
Configural learning 59, 163
Corrugator 59, 55
Cortisol reactivity 59, 93

Depressed mood 59, 93
Depression 59, 93
Diagnostic criteria 59, 15
Dm effect 59, 29
Dual task 59, 207
Dyslexia 59, 29

Emotion 59, 55
ERPs 59, 29
Event-related potential 59, 171
Event-related potentials 59, 105

Facial electromyography 59, 55
Facial expressions 59, 171

Gender 59, 69

Heart rate 59, 207
Height 59, 135
Homosexual 59, 135
Humans 59, 163
Human visual system 59, 187
Hypothalamic-pituitary-adrenal axis 59, 93

Interference 59, 207

Latency 59, 171
Latent inhibition 59, 69
Levator 59, 55
Longitudinal 59, 105

Mental arithmetic 59, 1
Mismatch negativity 59, 105

N400 effect 59, 29
N1/P2 59, 121
N2/P3a 59, 171

Oddball 59, 171
Orbicularis 59, 55

Pavlovian conditioning 59, 147, 163
Perceptual learning 59, 187
Peripheral visual field 59, 187
Post-acute phase 59, 105
Probability sample 59, 135
Psychological refractory period 59, 207
Puberty 59, 135

Reaction time task 59, 147
Reading impairment 59, 29

- Schizophrenia 59, 69, 105
Schizotypy 59, 69
Secretory immunoglobulin A 59, 1
Self-esteem 59, 93
Sexual orientation 59, 135
Skin conductance 59, 147
Skin conductance response 59, 163
Supervisory attention 59, 207
Symptoms 59, 15
Task duration 59, 1
Test–retest reliability 59, 1
Tryptophan depletion 59, 121
Uncontrollability 59, 93
Vernier stimuli 59, 187
Visual evoked potential (VEP) 59, 187
Weight 59, 135
