

Organic Chemicals Catalog. An 8-page catalog of over 200 fine chemicals includes silanes, deuterated solvents, amidines, and derivatives of piperonal. The company capabilities in custom synthesis and small-scale process development are also described. Marshallton Research Laboratories, Inc., Box 305, West Chester, Pa. 19380

636

Electrobalance Catalog. An all-product catalog, 16 pages, covers the company's electrobalances for scientific and engineering laboratory applications. Bulletin No. 135. Cahn Div., Ventron Instruments Corp., 7500 Jefferson St., Paramount, Calif. 90723

637

Instrumentation Catalog. The 1970 edition of the Honeywell Instrumentation Handbook describes the division's line of electronic test instruments and customer services. For information on how to obtain the handbook, contact C. F. Creswell, Honeywell Test Instruments Div., P.O. Box 5227, Denver, Colo. 80217

Company Periodicals

Requests for copies of the following publications should be sent directly to the address shown. Business or professional letterheads are requested.

Gas-Chrom Newsletter. Vol. 11, No. 3, 4 pages, describes a column packing technique and contains information on pretested Adsorbosils, phenol separations, acetylation kits, and drug analysis. Applied Science Laboratories, Inc., State College, Pa. 16801

Chromatography/Lipids. Vol. IV, No. 2, 8 pages, features an article on barbiturate analysis. Other articles cover free fatty acid analysis, new materials and reagents available, neuraminic acid analysis, and miscellaneous information. Supelco, Inc., Bellefonte, Pa. 16823

MPI Applications Notes. Vol. 5, No. 2, 8 pages, discusses pulse polarography: principles, instrumentation, integrated circuitry, and analytical precision and sensitivity. McKee-Pedersen Instruments, P.O. Box 322, Danville, Calif. 94526

Current Laboratory Practice. Vol. 2, No. 2, 16 pages, features an article on reproduction of immunoelectrophoresis separations and includes a special section on lipoprotein electrophoresis. Gelman Instrument Co., P.O. Box 1448, Ann Arbor, Mich. 48106

ATTENTION INFRA-RED SPECTROSCOPISTS

HERE'S HOW NOT TO DO IT
YOURSELF

ICL, recognized leaders in the manufacture of infra-red cells and crystals is also widely known for its **CELL RECONDITIONING SERVICE** that's fast, expert and low-cost.

Now, you can free yourself from this frustrating maintenance problem as have many universities and companies in the chemical, oil and rubber industries.

Follow the leaders to ICL for a cell reconditioning service that's sure to save time, temper and treasure.

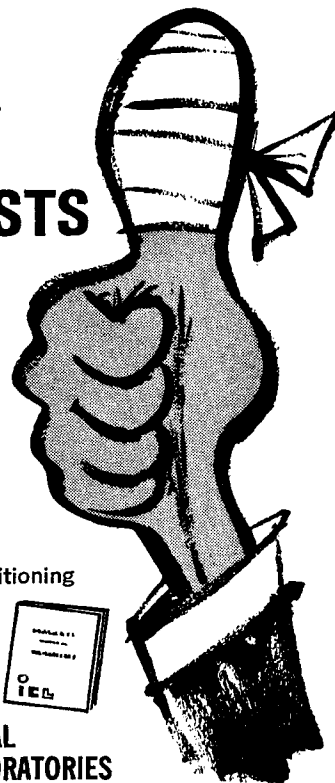

Write for catalogs and price lists on Crystals, Sealed Liquid Cells, Long Path Cells and Cell Reconditioning Service.

HAMAMATSU Scores a New Mileston in Photomultiplier Tubes

Our NEW side-on type, R446, has multialkali photocathode, hysteresis-free and designed to offer better detection stability in an uncomparable wide spectral response, ranging from 1850 to 8600 Å. These really new characteristics include upgraded sensitivity in the 7000 ~ 8000 Å which enables you to carry out advanced measurement in the red regions. And, is now ready for the highest-level applications in the various fields of photometry.

OUR PRODUCTS

Phototubes • Photomultiplier Tubes • Photoconductive cells • Special Vidicons
