

UNIGUIDETM

Template-Printed TLC Plates

MARKEDLY BETTER

TLC will never be the same
once you've used the new
Analtech UNIGUIDE Pre-Printed TLC plates.

UNIGUIDE is faster

- place sample spots directly on the printed dots. No template necessary. Channels are numbered for maximum convenience.

UNIGUIDE is more accurate

- read R_f values easily, precisely with printed metric scale on every plate. Printed points-of-origin provide positive spike for densitometry plus guide for accurate alignment.

UNIGUIDE is easier

- abrasion-resistant surface permits stacking plates without damage and can be written on. Spots scrape cleanly without flaking for sample recovery.

Complimentary samples of the ultimate convenience
in TLC with your call or letterhead request.
