

ENERGY POLICY

Editor: Nicky France

ENERGY POLICY is an international journal published 18 times per year by Elsevier Limited. The journal addresses the economic, environmental, political, planning and social aspects of energy supply and utilization which confront decision makers, corporate planners, managers, consultants, politicians and researchers. Major articles cover a comprehensive range of subject areas from national energy pricing to energy efficiency potential in the domestic sector; from the politics of US energy policy to the economic evaluation of nuclear power; from the environmental impacts of energy use to energy demand management in developing countries. The major articles provide balanced appraisals and rigorous analysis. All main articles are refereed.

Those wishing to submit articles, communications and viewpoints should consult the Notes for Authors on the inside back cover, and submit either in the Author Gateway, at <http://authors.elsevier.com/journal/enpol>, or by sending one hard copy and a disk containing the text in MS Word format to the Editor.
