Pharmacological Research The journal publishes papers on basic and applied pharmacological research and is proud of its rapid publication of accepted papers. Invited and unsolicited review articles are also featured.

Research Areas are:

- Biochemical and molecular pharmacology
- Cardiovascular pharmacology
- Gastrointestinal pharmacology
- Clinical pharmacology, if addressing novel mechanisms of action
- Respiratory tract pharmacology
- Urogenital tract pharmacology
- Pharmacology of tissue repair
- Neuropharmacology, psychopharmacology, and neuroendocrinology
- Chemotherapy and cancer therapy
- Immunopharmacology
- Pharmacological applications of genomics
- Pharmacology of aging PK/PD, if relevant to therapeutic effects
- Nutraceuticals, if relevant to human disease

Manuscripts must be submitted through the online submission available at: <http://ees.elsevier.com/yphrs>
