

Steroids

Simultaneous estimation of sterol and and steroidal sapogenin in plant extracts by densitometric TLC 250

Sterol

Simultaneous estimation of — and steroidal sapogenin in plant extracts by densitometric TLC 250

Stilbenes

Group separation of steroidal hormones and — from biological material 232

Styrenes

TLC determination of the stability of complexes of substituted — on silver nitrate-impregnated silica 175

Succinic acid

An application of the ligand exchange method to the separation of some aliphatic

carboxylic acids 127

Sugars

A two-dimensional TLC method for screening carbohydrate anomalies 51

L-Theanine

GC and MS studies on — and its trimethylsilyl derivative 39

Thermodynamics

Retention volume in high-pressure GC. 1. — of the specific retention volume 1

Transphoresis

Isotachophoresis (displacement electrophoresis, —) theory. Structure of the ionic interface 133

Water content

Influence of the — of the solvent on chromatographic separations 27

Errata

J. Chromatogr., 93 (1974) 7–15

Page 9, eqn. 11 should read " $\vec{F}_B(\vec{r}, t) = q \cdot n(\vec{r}, t) \cdot \vec{E}(\vec{r}, t) - \vec{J}(\vec{r}, t) \cdot \vec{F}_B^{ex}(\vec{r}, t)$ ".

The first line after eqn. 12 should read "where P_i is the ionic partial pressure, $\vec{\sigma}$ the internal frictional force tensor among the".

Page 10, eqn. 20 should read " $n(\vec{r}, 0) = N \left(\frac{a}{\gamma} \right)^{3/2} \exp[-\alpha r^2]$ ".

eqn. 21 should read " $n(\vec{r}, t) = N \left(\frac{a}{\gamma} \right)^{3/2} \cdot \frac{1}{(1 - 4D \cdot \alpha \cdot t)^{3/2}} \cdot \exp[-\alpha(\vec{r} \mp \mu \cdot \vec{E} \cdot t)^2 / (1 - 4D \cdot \alpha \cdot t)]$ ".

J. Chromatogr., 93 (1974) 251–252

Page 251, the last equation should read " $4 \int_{\delta_{\min.}}^{\delta} (1/\delta) dV_{\epsilon} = 4\omega \int_{\delta_{\min.}}^{\delta} (1/\delta) d\delta = 4\omega \ln(\delta/\delta_{\min.})$ ".
