Cardinal Industrial Finishes
S. El Monte, Calif.

Cardinal Industrial Finishes will feature examples of environmentally compliant liquid and powder coatings available from the company on a variety of manufactured products.

Circle 618 on the reader service card

Challenge Inc.
Indianapolis

Challenge Inc. will be showing Rinse 6107, an environmentally friendly chrome-free sealer that provides excellent salt spray resistance, humidity resistance, and paint/powder adhesion. This mildly alkaline, clear liquid is water-soluble. It is recommended for use over iron or zinc phosphate at an economical 1% concentration, requiring just one titration and no separate pH adjustment. Rinse 6107 is easy to control and has consistently demonstrated salt spray ratings from 500 to 1,000 hr in repeated trials.

Circle 619 on the reader service card

Champion Laboratories Inc.
Albion, Ill.

Champion Laboratories Inc. will be showing cartridge filters for powder coating and dust control

applications along with the Vantage V+ cartridge collector providing exceptional efficiency and ease of maintenance.

Circle 620 on the reader service card

Chemco Mfg. Co.
Northbrook, Ill.

Chemco Mfg. Co. is displaying a filter cartridge, with divided pleat media that makes up the cartridge, assures uniform pleat spacing, optimizes pleat count, lowers pressure drop, and allows for easier cleaning.

Circle-Proscio Inc.
Bloomington, Ind.

Circle-Proscio Inc. will present Steelcote 1200, a phosphate-free conversion coating that provides an alternative to traditional iron phosphate, and Alcoat 1000, a series of nonchrome conversion coatings developed for aluminum substrates.

Circle 622 on the reader service card

Ciscan Industries Ltd.
Edmonton, Alb.

Ciscan Industries Ltd. will feature Cata-Dyne catalytic gas IR oven systems for finishing and process heating application, and Cata-Dyne washers.

Circle 623 on the reader service card

CMI International
Grove Village, Ill.

CMI International will show a complete line of coating thickness measurement instruments. The CMI 100 and 200 are portable gauges designed to measure paint and powder coat.

Circle 624 on the reader service card

Coating Pro Software
Westmont, Ill.

Coating Pro Software will display complete job control software for powder coating and painting shops with integrated quote control, order processing, active inventory control, comprehensive

production reports, accounting links, and more.

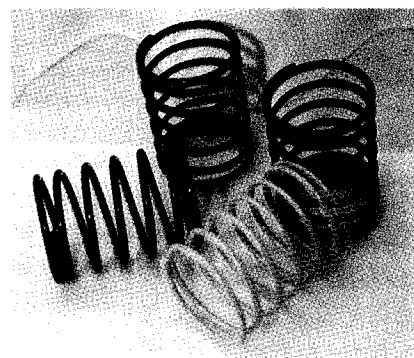

Circle 625 on the reader service card

Composition Materials Co.
East Fairfield, Conn.

Composition Materials Co. will present the Plasti-Grit System with full reclaim feature for stripping powder coatings.

Circle 626 on the reader service card

Continental Industries Inc.
Tualatin, Ore.

Continental Industries Inc. will feature Epflor, a blend of thermosetting powder coating and PTFE. Available in polyester, epoxy, urethane, and hybrids, Epflor can be applied with standard electrostatic spray equipment. Epflor reduces the coefficient of friction by more than 33% compared to non-modified powder coatings. Both standard and custom colors, including clears and textured finishes, are available.

Circle 627 on the reader service card

Coral Chemical Co.
Waukegan, Ill.

Coral Chemical Co. will demonstrate the GL-100 controller and finished products from customers using our pretreatment, anodizing, metal-working fluids, and waste treatment products.

Circle 628 on the reader service card

Cornerstone Systems Inc.
Crystal Lake, Ill.

Cornerstone Systems Inc. (CSI) will be featuring its best-selling Visual Shop software designed specifically for the coating and
