M.D. Ward (Sheffield, UK)

R.E.P. Winpenny (Manchester, UK)

M. Zaworotko (Tampa, FL, USA)

Aims and Scope

Polyhedron will publish original, fundamental, experimental and theoretical work of the highest quality in all the major areas of inorganic chemistry. These include synthetic chemistry, coordination chemistry, organometallic chemistry, bioinorganic chemistry, and solid-state and materials chemistry. Papers should be complete pieces of work, and the inclusion of results from spectroscopic and/or physical techniques is encouraged. Papers merely reporting the preparation and X-ray structural characterization of only a single compound will not be considered appropriate unless the compound and its structure are particularly interesting.

Similarly, papers concerned solely with stability constants determined by potentiometric titration data unsupported by other e.g. spectroscopic techniques will not be acceptable nor will solvent extraction data unless supported by other data of interest to inorganic chemists. Unnecessary fragmentation of work is not acceptable.

In addition Polyhedron publishes specially commissioned review articles (Polyhedron Reports) and collections of original research papers (Polyhedron Symposia-in-Print) of appropriate timeliness.

Publication Information: Polyhedron (ISSN 0277-5387). For 2005, volume 24 is scheduled for publication. Subscription prices are available upon request from the Publisher or from the Regional Sales Office nearest you or from this journal's website (<http://www.elsevier.com/locate/poly>). Further information is available on this journal and other Elsevier products through Elsevier's website (<http://www.elsevier.com>). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by standard mail (surface within Europe, air delivery outside Europe). Priority rates are available upon request. Claims for missing issues should be made within six months of the date of dispatch.
