

Subject Index

- Annulate Lamellae, in echinoderm oocytes, JUR 266
- Autoradiography, method for making monolayers of silver halide crystals, 293
- β -Galactosidase, from *Escherichia coli*, JUR 251
- Bacteria, lysis of *Escherichia coli* B by Coliphage T2, COTA-ROBLES and COFFMAN, 304; membranes in *Escherichia coli* cells, KUSHNAREV and PEREVERZEV, JUR 274
- Bacteriophages, filamentous and RNA forms, JUR 255
- Brain, isolation of neurons from, 350
- Brain, cat, laminated body in lateral geniculate body neurons, MORALES, DUNCAN and REHMET, 116
- ood vessels, nucleoside phosphatase activity
- Blin, 103
- Calcification, bovine enamel, 362; neutral soluble proteins of developing, GLIMCHER, TRAVIS, FRIEBERG and MECHANIC, 362
- Cell Division, cell plate formation in plants, JUR 247
- Crystals, of macromolecules formed by *Bacillus thuringiensis*, 66
- Cytochemistry, nucleoside phosphatase activity in small blood vessels, 103
- Cytomembranes, globular structure of, 263
- Diatom, post mitotic fine structure, 217
- Fixation, freezing point method to adjust tonicity, TAHMISIAN, 182
- Fundus glands, mouse, 160
- Intestine, lamina muscularis mucosae, JUR 260; small intestine in Whipple's disease, 124
- Invertebrates, marine decapods, nephrocyte of gills of, 1; *Mytilus edulis*, structure of fertilized egg and two-cell stage, HUMPHREYS, 224; photoreceptor cells in, 334; photoreceptor cells in the planarian *Dugesia tigrina*, MACRAE, 334; smooth muscle cells of *Ascaris lumbricoides*, 48
- Macromolecules, β -Galactosidase from *Escherichia coli*, JUR 251
- Meibomian gland, mouse, lipid droplets in, PARAKKAL and MATOLTSY, JUR 254
- Membrane ultrastructure, mitochondria and cytomembranes, 263
- Mitochondria, degeneration in lead poisoning, WATRACH, 177; globular structure of mitochondrial membranes, 263; ATPase activity, localization of, LAZARUS and BARDEN, 189
- Muscle, smooth, sarcoplasmic reticulum in, 48
- Muscle, smooth, cellular interrelationships and electrical activity in, LANE and RHODIN, JUR 261; in lamina muscularis mucosae, JUR 260; junctional structure of, JUR 265, rat uterus, estrogen effect on, JUR 270
- Nephrocyte, of gills in marine decapods, 1
- Nervous system, squid, synaptic contacts in the stellate ganglion, CASTEJON and VILLEGAS, JUR 275
- Nucleolus, effect of actinomycin D, 224; fat in, THOENES, 194; RNA and proteins in, JUR 248
- Nucleoside Phosphatase, activity in small blood vessels, 103; activity in urinary bladder of the toad, BARTOSZEWICZ and BARNETT, JUR 269
- Nucleus, effect of actinomycin D on nucleolus, SCHOEFL, 224; fat in nucleolus, THOENES, 194; RNA and proteins in nucleolus, JUR 248
- Oocytes, amphibian, cytoplasm of, 14; echinoderm, origin and structure of annulate

- lamellae, JUR 266; Salamander *Triturus viridescens*, formation of yolk, JUR 262; cytoplasmic changes in pigment formation, JUR 263; Avian, unusual organelle in, PRESS, JUR 273
- Ovum, fertilized *Mytilus edulis*, 244; rabbit, cortical follicles in, 58
- Pancreas, rat, after occluded outflow, 89
- Parathyroid gland, human, water-clear cell in, SHELDON, 377
- Phosphatase, in small blood vessels, 103; in urinary bladder of toad JUR 269
- Pituitary gland, Salamander, 317; thyroidectomy cells in, CARDELL, JUR 271
- Placenta, of the rat, 27
- Pyloric gland, mouse, 145
- Retina, filamentous organelles in the receptor-bipolar synapses, MOUNTFORD, 207; Leopard frog, classification of retinal receptors of, NILSSON, JUR 253
- Stomach, mouse, fundus glands after refeeding, 160; pyloric gland in, 145
- Synapses, retina, filamentous organelles in, 207; squid, stellate ganglion of, CASTEJON and VILLEGAS, JUR 275
- Teeth, bovine, calcified layer of coronal cementum, 76
- Urinary bladder, toad, nucleoside phosphatase activity in, BARTOSZIEWICZ and BARNETT, JUR 269
- Uterus, rat, estrogen effect on smooth muscle of, JUR 270
