Webster Pumps Don't Just Stand Up To Corrosive Chemicals, They Stand The Test Of Time.

Whether they're pumping for aeration, agitation, filtration, recirculation, spraying or transfer, Webster's rugged, continuous duty pumps are ideal for the plating, electronics, photo processing, pollution control, chemical processing and water treatment industries.

Both our Vertical Seal-less Immersibles and our Horizontal End-Suction Centrifugals are available in your choice of corrosion-resistant CPVC, Polypropylene or PVDF (Solef®) with non-metallic construction so that no metal parts come in contact with corrosive chemicals. Dependable and cost-effective, Webster Pumps can handle applications ranging from 5 to over 100 gallons per minute.

For the name of a Webster Pumps distributor or to discuss your specific application requirements, call 1-800-766-1950.

Webster Pumps®

Distributor Territories Available.
