Look Beyond Our Instruments

And you will see that
ThermoQuest means...

Integrated product solutions, global support and a greater investment in research and development.

As ThermoQuest companies, Finnigan, CE Instruments and Thermo Separation Products are focused on providing integrated solutions to your analytical needs.

Bringing together companies that have earned a worldwide reputation for innovation and quality, ThermoQuest has become a single source for mass spectrometer, LC and GC solutions.

Call a ThermoQuest representative anywhere in the world and you will promptly receive information, service, technical support, training or supplies.

It's this mixture of technology and people that makes ThermoQuest stronger than the sum of our parts. And it's why, when you look beyond our instruments, you see better ways of acquiring information through separations.
